# Welcome To Your Anew Smile Journey

The Anew® Smile purpose is to help empower people through their smile. We know firsthand how much a smile can impact ones life. A truly spectacular smile can help elevate your confidence, empowering you to be the best version of yourself.

At Anew® Smile, our team wants to help you achieve your dream smile, the one you truly deserve. Our team take care and listens to your story without judgment, providing you with a safe space to achieve your dream smile.

# What Are All on Implants™?

All on Implants™ is the full replacement of teeth and gums in just 3 days. Full mouth dental implants mimic the functionality and look of natural teeth, giving you the beautiful, perfect smile you deserve.

Full mouth dental implants are the most permanent and efficient solution, providing a full set of

teeth on a minimum of four implants. It functions as closely to a natural set of teeth as possible, allowing you to eat, brush and floss as normal.

All on Implants™ at Anew® Smile are personalised to each patient, restoring functionality to your smile.

# Why Should You Choose All on Implants™?

All on Implants™ provides a great alternative for people who have failing teeth or have lost all their teeth and rely on having a denture. Having a fixed alternative reduces the need to take a denture in and out while mimicking a real smile both functionally and aesthetically.

Anew® Smile is recognised by the Straumann Group, the world-leading brand in implantology, as the only NeoArch Centre of Excellence in the Asia Pacific Region. We have helped to transform over 2,000 smiles with our All on Implants™ technique, achieving a 98% success rate!

# Who Should Choose All on Implants™?

All on Implants™ are designed for people who have failing or compromised teeth due to gum disease or bone loss.

It is also an ideal option for people who have partial or full dentures due to missing teeth, as it provides a permanent solution to replace all teeth and gums.

# What is the process for All on Implants™?

1

## Comprehensive consultation

During your initial consultation, our Anew® Smile team will take the time to listen and understand your journey, aspirations, and concerns. This will help us get to know you better as well as assess if All on Implants™ is the best option for you.

2

## Design

If All on Implants is right for you, we will proceed to design your treatment plan and outline the range of payment options available, including early super release. We will then take a 3D bone scan of your teeth to use for your smile design and complete your treatment plan.

3

## Preparation

We complete the foundation for full-mouth dental implants by preparing your bone and gums, removing all infections and diseases and then placing the implants under either local or general anaesthesia to ensure maximum comfort and treatment success. This is generally carried out on Day 1 out of your 3-Day treatment.

4

## Trial Smile

On Day 2, we collaborate with you to design your new smile, taking into account your unique facial structure and ideal aesthetic. Part of this collaboration is a wax trial smile, so you can preview what your new smile will look and feel like. This trial smile process enables you to make changes to the shape, size and colour of your new set of teeth so that you can love every aspect of your new smile.

5

## Final Insert

On Day 3, your newly designed All on Implants™ smile is inserted. Once complete, we undergo a final check and review of your new smile. At this point, changes can still be made to ensure you're completely satisfied. At Anew® Smile, we don't finish your treatment until you're completely happy with the result; after all, you'll have this smile for the rest of your life.

# Average Cost of Implants

Cost of treatment differs depending on each case, however, as a range, All on Implants™ start at approximately **\$123 per week.**

The cost does vary depending on your individual case; however, per arch the cost is approximately \$22,000. We have many payment options available to make your treatment as accessible as possible.

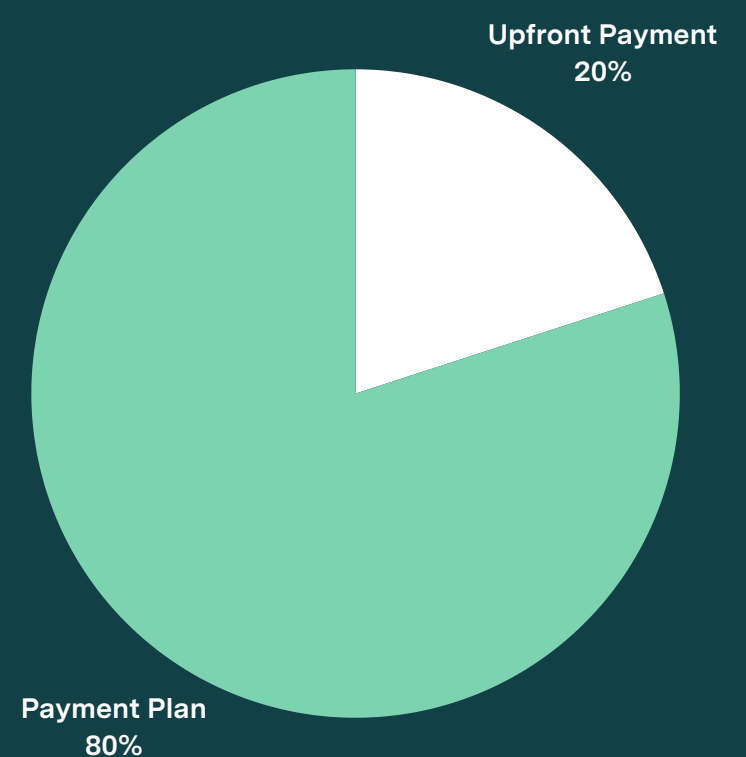

Our team will also work closely with you to help create a smile that aligns with your budget.

## Financing Options

At Anew® Smile our finance options include payment plans, upfront payments, & health insurance, as well as early superannuation release.

We do recommend taking time to investigate all your dental payment options before proceeding with your treatment.

We also suggest discussing your treatment with your health insurance fund, family, and/or trusted financial advisor before making a decision.

From just  
**\$123**  
per week

## Repayment Terms

At Anew® Smile, we offer a variety of payment plans with differing conditions to suit your budget.

We have a 40-month payment plan with 0% interest. We also have another option of up to 7 years repayment term, interest based from \$123 per week.

## Accessing Superannuation

As an option, you may be eligible for compassionate release of super to pay for necessary medical treatment. The ATO can only approve release of super on compassionate ground if you meet the criteria. You can learn more [here](#).

## Paying Upfront

Payment upfront is of course another option you can choose. A deposit can be made at your first appointment and subsequent fees paid at each visit after.

# Not Right For Your Budget?

Seek our alternative treatment options

## Single Dental Implants

This is used to replace one missing tooth. A singular titanium implant is placed into the jawbone to replace the missing tooth's root, and a dental crown is attached on top.

## Multiple Dental Implants / Implant Bridge

A traditional implant bridge is a permanent, cost-effective solution that functions like a natural set of teeth.

## Overdenture

This option provides a secure denture for more comfort and practicality than regular dentures. While still removable, they clip or screw into dental implants to keep them in place.

## Partial / Full Denture

A partial or full denture is removable and provides a solution to replace missing teeth. They are prosthetic devices that are supported by the surrounding soft and hard tissue.

# Next Steps?

If you want to explore whether full-mouth dental implants are suited to you, the next step is to book a complimentary consultation with our team. This will allow our team to assess your current smile and discuss the options available to you moving forward.

---

## Your First Consult

When visiting Anew<sup>®</sup> Smile, here is what you can expect from your first consultation:

You will meet our implant consultant, who will take you through a thorough discussion of your story, concerns, needs, budget, fears and many more elements. We want to get to know you and what your dream smile looks like. We need to determine whether All on Implants is the right solution for you.

3D scans will be taken to assess your bone levels. Finance options will be discussed, including payment plans, superannuation and upfront payment.

# 1000 Smiles & Counting

Is yours next? At Anew<sup>®</sup> Smile, we have transformed over 2,000 smiles, and we are one of the only clinics in Australia with over 1000 before and after results displayed online, as we are so proud of each and every smile makeover we have achieved.

Our team is dedicated to creating spectacular results every single time.
